SLITE TECHNOLOGIES

About SLITE Technologies

Founded in 2005, SLITE Technologies Company was initially web Application Company. Among SLITE's many popular products, Mobile Software's, Marketing Software's and ERP Software's.

Started in 2006 at Trichy, SLITE Technologies has been focusing on the electronic publishing. Implementation of ERP Software's has become the primary development task. Today, SLITE's ERP product line covers many types of ERP applications. SLITE's has always been the excellence in quality of products and software services.

The company was currently started its new Offshore Development centre at Trichy. SLITE Technologies, a leading corporate company with nation wide presence, is the single largest source for a wide range of software products and services.

SLITE is a leading provider of scalable integrated enterprise software solutions for various organizations such as financial, manufacturing, health care, transportation, retail and pharmaceuticals which are located in India and abroad.

For nearly 4 years, our customers and students have inspired us to create, manufacture and develop advanced technologies to meet the ever growing requirements, through stringent quality expectation, hostile operating conditions and timely targets demanded by our customers and students.

Deploying a website or business application requires more than just software. We offer a number of important services that help our customers to improve the way they work and manage information.

Our highly creative website development team design and build fresh, dynamic websites for organizations of all sizes. Combining years of experience with the very latest technologies we can ensure that your online business strategy is effective and tightly integrates with your day-to-day processes.

You can employ our software development services to create the exact software application your organization needs. We can design and build virtually any kind of software to a defined specification using industry standard development languages. Our software is used by thousands of people every day, improving the way they work by simplifying inefficient procedures.

SLITE Development Team

SLITE Software now has many experienced experts and engineers working in five different teams:

- SLITE Core Technology Development
- SLITE User Interface Development
- SLITE Customization Development
- SLITE Mobile Technology Development
- SLITE Networking Application Development

Vision

To be a technology company that understands the needs of a customer and delivers quality software solutions by qualified professionals. Recent rapid development in science and technology requires co- operation between University and industry. In response to this demand we aim to bridge and strengthen the collaboration between them.

Mission

- Education in core and inter disciplinary areas of technical sciences, technology and engineering through R&D works.
- Increasing public awareness of science and technology issues particularly among the young.
- Adjust flexible target oriented organizational structure to be able to rapidly respond to new challenges and provides means for efficient technology transfer to the industry.
- To design, develop and deploy powerful software that enables our customers to automate their business processes.

INDUSTRY PARTNERS

CZAR Tech Solutions

We work closely with our sister company CZAR Tech Solutions to meet even the most complex needs.

ABU Groups and IMRAS Computers

We can help you fully integrate our software into your computing systems.

Services Overview

We create websites, custom-built applications and software products that enable your organization to streamline efficiency, increase productivity and work smarter.

Our comprehensive website development services encompass all aspects of the technical and creative process necessary to develop a successful website. The websites we build are supplied with full content management facilities that allow you to easily add, edit and delete content. This enables you to manage your own website without the need for advanced technical knowledge.

We use industry standard development languages and a quality-driven approach to design and build virtually any kind of software application to a defined specification.

We can create custom-built software applications for you that enable your organization to streamline efficiency, increase productivity and work smarter. Our highly skilled, multidiscipline graphic design team can provide you with a wide range of services in both print and digital mediums.

Training Services provide a range of training options that ensure you derive maximum benefit from your new website, custom-built application or our software products.

Website Development

We design and build fresh, dynamic websites for organizations of all sizes. Combining years of experience with the very latest technologies we can ensure that your online business strategy is highly effective and tightly integrates with your day-to-day processes.

We believe that you should be able to easily manage and maintain your own website. When you commission a website from SLITE it is supplied with an inbuilt, multi-lingual Content Management System (CMS). All you need to manage your website content or menu structure is an internet connection, web browser and a basic understanding of word processing.

Our first step is always to meet with you and learn everything we can about your requirements, your business, our target market and your competition. This information will help our website design and development team to create draft designs for your feedback and approval.

We work closely with you during each stage of the website creation process. Whether you want a simple website or a fully-fledged ecommerce solution, we can help you to realize your online ambitions.

When you commission a website from Nexus we guarantee to supply you with a unique, interactive website that exceeds your expectations.

Software Development

We use industry standard development languages and a quality-driven approach to design and build virtually any kind of software application to a defined specification.

Software development services supply the keystone to our technical portfolio. Our team of experienced engineers develop innovative client-server, desktop, mobile and web based software solutions for organizations of all sizes.

We can create custom-built software applications for you that enable your organization to streamline efficiency, increase productivity and work smarter. Our software is used by thousands of people every day, improving the way they work by simplifying inefficient procedures.

The first stage in developing a custom-built software application begins with the information derived from a customer needs analysis and viability study. We can help you to visualize, plan and deliver your software project from conception to completion.

No matter how large or small your software development requirements, we will identify the right technologies and methods to meet your objectives.

Training facilities

SLITE Technologies has the modern facilities to enable a clean and transparent interaction between the management and the staff.

Good collection of technical books are maintained in the library, supported with journals, manual and other technical periodicals.

There are many knowledgeable and well experienced Technical Staff and Administration Staff working in SLITE Technologies.

RESEARCH & DEVELOPMENT

The Research and Development unit continuously monitor and provide support to the products, apart from providing innovative solutions to the customers. With the technological advancement, the products are upgraded, thus keeping in par with the industrial requirements.
